EDISON

ABOUT US:

Edison is focused on transforming modern living through smart home automation solutions that combine technology, convenience, and design. Established in 2004 with a manufacturing unit in Gandhinagar, the journey began with push button switches and evolved into touch switches, retrofit devices, smart locks, and smart glass panels.

With a strong focus on quality and innovation, Edison continues to create intelligent solutions that enhance comfort, control, and everyday living.

OUR STORY

Driven by innovation and precision, Edison has built a strong foundation with advanced in-house manufacturing capabilities. Equipped with automated systems such as robotic machinery, optical inspection systems, automatic testing units, and pick & place machines for SMD components, the process ensures high efficiency and accuracy.

With technologies like laser marking, laser cutting, selective soldering, wave soldering, and automated assembly for DIP components, every product is crafted with consistency and quality. This commitment to advanced manufacturing enables Edison to deliver reliable and future-ready home automation solutions.

OUR USP's

Premium Quality & Reliability

Engineered for long-lasting performance with rigorous quality testing and global standards.

Designed for Modern Living

A perfect blend of technology, aesthetics and convenience for modern homes and spaces.

5-Year Warranty on Touch Panels and Switches

Backed by a 5-year warranty for long-term reliability and complete peace of mind.

Wide Connectivity

Supports Zigbee, Tuya, Wi-Fi and seamless integration with leading smart home ecosystems.

End-to-End Support

From design consultation to after-sales support, we ensure a seamless experience.

CERTIFICATIONS:

Video Door Phone

A SAFER HOME
A SMARTER TOMORROW

7 INCH WIRELESS VDP

The 7 Inch Wireless Video Door Phone offers seamless connectivity with easy installation and flexible usage. With a clear display and two-way communication, it enhances smart home security.

Supports Alexa
